

Kathi's Story

Kathi Muhammad, Retired, U.S. Department of Defense

My cause is global health because everyone should have access to good health care. Despite incredible improvements in health there are still a number of challenges to consider. One billion people lack access to health care systems. Each year, 36 million deaths are caused by noncommunicable diseases, such as cardiovascular disease, cancer, diabetes, and chronic lung diseases. The CFC is a vehicle that is used to help others globally. CFC funding saves lives by providing the resources needed to improve the health of others around the world. The money that we donate is money that we may spend on coffee and a doughnut. This money is a lifesaver for so many.

“My cause is global health because everyone should have access to good health care. Despite incredible improvements in health, there are many challenges. CFC funding saves lives by providing the resources needed to improve the health of others around the world.”
